Projects

E-Commerce Site(React, ContextAPI, Bootstrap)
Created a simple platform to buy and sell products using ReactJs.

🔗 https://github.com/Gintama7/ecom-app2-with-bootstrap

- Used Google Firebase for user authentication, data storage and hosting.
- Added page protection to prevent any unauthorized access to the page.

Expense Tracker (React, Firebase, Redux, Bootstrap)
Created a simple platform using React to keep the track of expenses done by a user

🔗 https://expense-tracker-v2-e6698.web.app/

- Integrated email verification and password reset functionalities using Firebase APIs.
- Implemented a simple dark mode theme for premium users.

Gmail Clone (React, Redux, Firebase,Bootstrap)
Created a dummy mail box where user can send and receive mails.

🔗 https://mail-box-client-39877.web.app

- User can see all the mails they have sent and received by using sidebar tabs.
- Integrated the seen feature where users get to know if they have already seen the mail or not.

Todo List (NextJs, MongoDB)
Simple Todo list app made on NextJs.

🔗 https://nextjs-todo-app-ochre.vercel.app/

- Users can add and remove todos.
- Users can mark todos as done which will be shown in done page
